**Subject:** Plastic bags

Hi

I am a part time cashier at Long's in Hawaii Kai and advocate for a cleaner planet now and in the future. It would be to Oahu's benefit to ban entirely the use of all plastic bags. We have a sensitive eco system and are fortunate enough to live in paradise. The plastic bags being seen as litter around the island and just not breaking down period is enough for me to say get rid of them. People may grumble at first, but they will adapt. After all Europeans and other cultures don't find it difficult to bring and utilize a bag when shopping for groceries. Let's move forward Hawaii instead of being the caboose....
